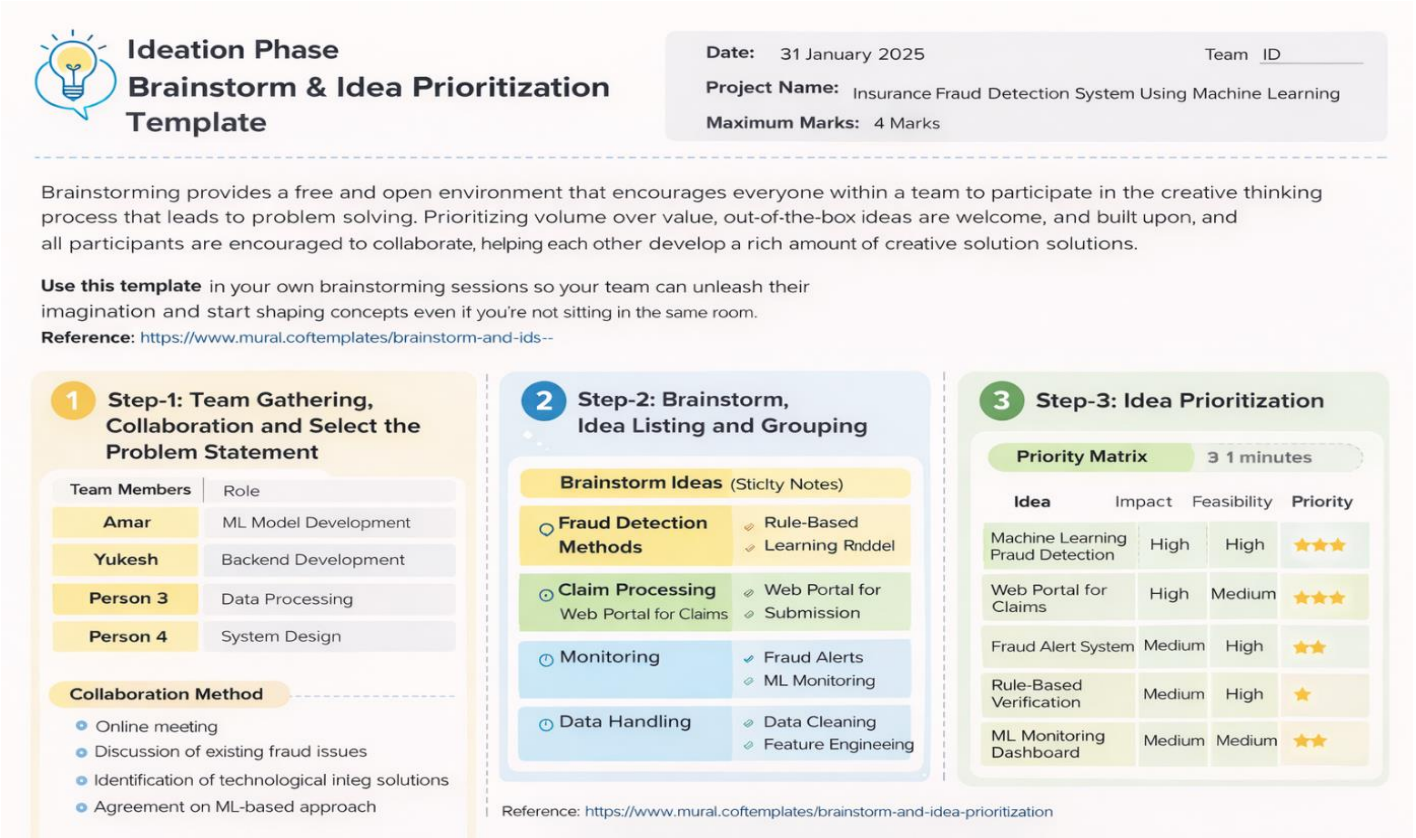
Ideation Phase
Brainstorm & Idea Prioritization Template

Date	
Team ID	
Project Name	**Insurance Fraud Detection System Using Machine Learning**
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:



Step-1: Team Gathering, Collaboration and Select the Problem Statement

Team Discussion

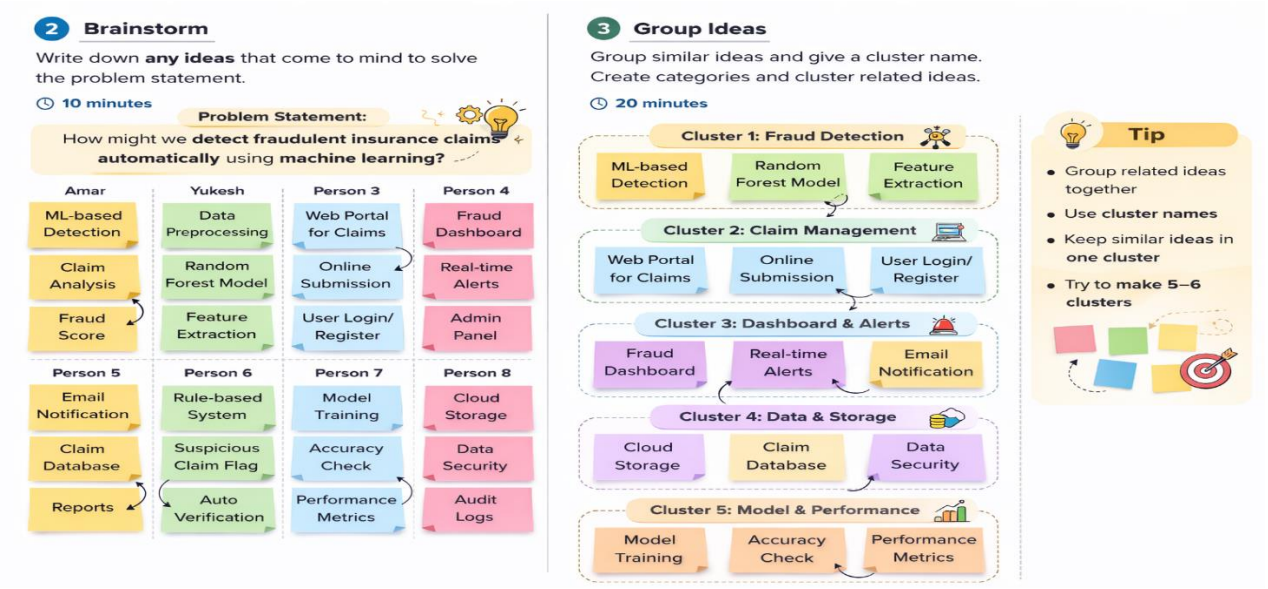
The team discussed the increasing number of **fraudulent insurance claims in health and vehicle insurance**. Many insurance companies face **financial losses and delayed claim processing** because fraudulent claims are difficult to detect manually.

Selected Problem Statement

Insurance companies struggle to **identify fraudulent health and vehicle insurance claims efficiently**. Manual verification is time-consuming and may lead to human errors.

Proposed Solution

Develop a **Machine Learning based Insurance Fraud Detection System** that analyzes claim details and predicts whether a claim is **fraudulent or legitimate**.



Step-2: Brainstorm, Idea Listing and Grouping

During the brainstorming session, the team generated multiple ideas to solve the problem.

Idea List

Idea No	Brainstormed Idea
1	Use Machine Learning to detect fraudulent insurance claims
2	Analyze previous claim history to detect suspicious patterns
3	Create a fraud risk score for each claim
4	Use data visualization dashboards for claim analysis
5	Automatic alert system for high-risk claims
6	Integration with insurance company databases
7	Generate fraud investigation reports
8	Use anomaly detection techniques to identify unusual claims

Grouping of Ideas

Category	Ideas
Fraud Detection	ML fraud prediction, anomaly detection
Data Analysis	Claim history analysis, pattern detection
User Interface	Dashboard for insurance officers
Decision Support	Fraud risk score, automated alerts

Step-3: Idea Prioritization

Ideas were prioritized based on **feasibility, impact, and implementation time**.

Sr.no	Idea	Impact	Feasibility	Priority
1	Machine Learning fraud prediction	High	High	High
2	Fraud risk score system	High	Medium	High
3	Dashboard visualization	Medium	High	Medium
4	Automated alerts	Medium	Medium	Medium
5	Integration with external databases	High	Low	Low
