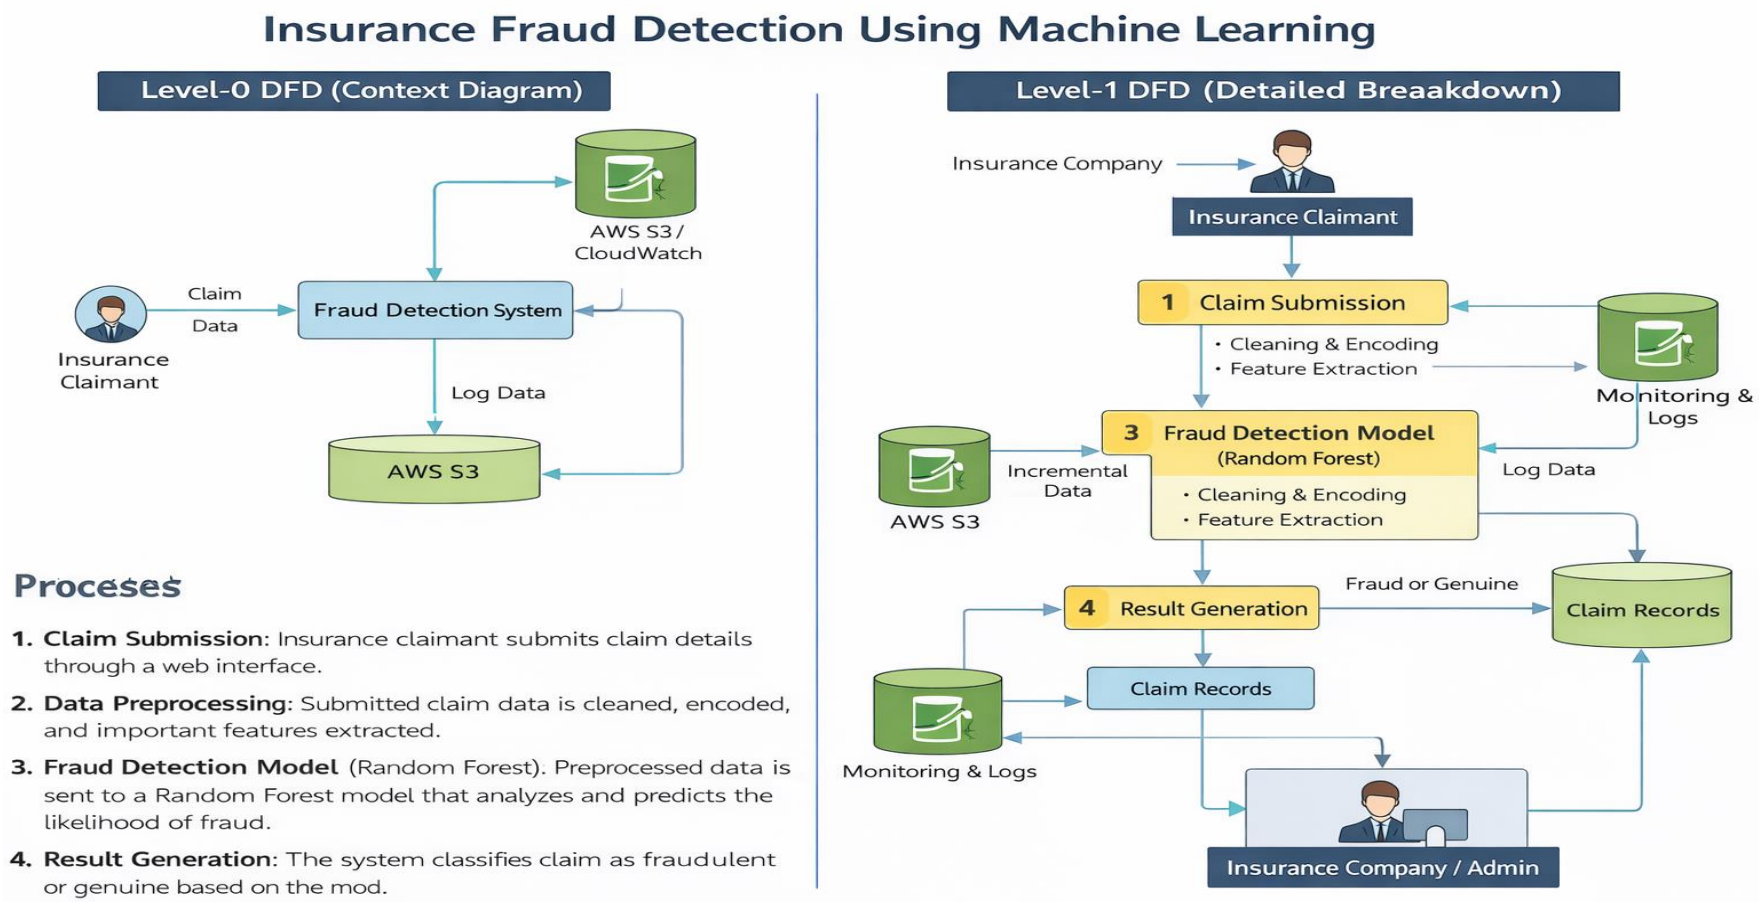
Project Design Phase-II
Data Flow Diagram & User Stories

Date	
Team ID	
Project Name	**Insurance Fraud Detection Using Machine Learning**
Maximum Marks	4 Marks

Data Flow Diagram ;



User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Web User)	Registration	USN-1	As a user, I can register in the application by entering my name, email, and password	User can successfully create an account	High	Sprint-1
Customer (Web User)	Registration	USN-2	As a user, I receive a confirmation email after registering	User receives confirmation email and activates account	High	Sprint-1
Customer (Web User)	Login	USN-3	As a user, I can log into the application using email and password	User can access the dashboard after login	High	Sprint-2
Customer (Web User)	Claim Submission	USN-4	As a user, I can submit insurance claim details through the web interface	Claim data is successfully submitted and stored	Medium	Sprint-1
Customer (Web User)	Fraud Detection	USN-5	As a user, I can view the fraud prediction result for my submitted claim	System displays fraud or genuine result	High	Sprint-2
Customer Care Executive	Claim Monitoring	USN-6	As a customer care executive, I can view all submitted claims	Claims are visible in the system dashboard	Medium	Sprint-2
Customer Care Executive	Claim Verification	USN-7	As a customer care executive, I can review suspicious claims flagged by the system	Fraud-flagged claims are displayed for investigation	Medium	Sprint-2
Administrator	System Management	USN-8	As an administrator, I can manage users and monitor system performance	Admin dashboard displays users and logs	High	Sprint-3
Administrator	Model Monitoring	USN-9	As an administrator, I can monitor machine learning model performance	Model logs and analytics are available	Medium	Sprint-3
